The Association Montessori Internationale was founded in 1929 to uphold, promote and propagate the breadth and depth of Dr. Maria Montessori's vision, for the child. It is based upon a scientific pedagogical approach which seeks to comprehend the nature of human development from birth to maturity. Understanding development allows adults to prepare themselves and a suitable environment in which to enhance every child's potentiality.

AMI's core mission is to realize Dr. Montessori's ultimate aim: to place all the children in our world at the centre of society and to assist them in becoming the transforming elements – leading to a harmonious and peaceful humanity.

It has played an effective role in making Montessori pedagogy available to a wide range of the world's children whilst maintaining the support systems necessary to ensure that what is offered upholds the quality and integrity of approach all children so richly deserve. AMI is recognized worldwide for the standard of its training and the scope of its endeavors.
